*Mathematics for Secondary School Teachers* discusses topics of central importance in the secondary school mathematics curriculum, including functions, polynomials, trigonometry, exponential and logarithmic functions, number and operation, and measurement.

Acknowledging diversity in the mathematical backgrounds of pre-service teachers and in the goals of teacher preparation programs, the authors have written a flexible text, through which instructors can emphasize any of the following: Basics: exploration of key pre-college topics from intuitive and rigorous points of view; Connections: exploration of relationships among topics, using tools from college-level mathematics; Extensions: exploration of college-level mathematical topics that have a compelling relationship to pre-college mathematics.

*Mathematics for Secondary School Teachers* provides a balance of discovery learning and direct instruction. Activities and exercises address the range of learning objectives appropriate for future teachers. Beyond the obvious goals of conceptual understanding and computational fluency, readers are invited to devise mathematical explanations and arguments, create examples and visual representations, remediate typical student errors and misconceptions, and analyze student work. Introductory discussion questions encourage prospective teachers to take stock of their knowledge of pre-college topics. A rich collection of exercises of widely varying degrees of difficulty is integrated with the text. Activities and exercises are easily adapted to the settings of individual assignments, group projects, and classroom discussions.

*Mathematics for Secondary School Teachers* is primarily intended as the text for a bridge or capstone course for pre-service secondary school mathematics teachers. It can also be used in alternative licensure programs, as a supplement to a mathematics methods course, as the text for a graduate course for in-service teachers, and as a resource and reference for in-service faculty development.

**From reader reviews:**

**William Stewart:**

What do you with regards to book? It is not important along with you? Or just adding material when you need something to explain what you problem? How about your spare time? Or are you busy person? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? All people has many questions above. They should answer that question due to the fact just their can do this. It said that about book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this kind of Mathematics for Secondary School Teachers (Maa Textbooks) to read.

**Janet Kline:**

Typically the book Mathematics for Secondary School Teachers (Maa Textbooks) will bring that you the new experience of reading the book. The author style to spell out the idea is very unique. In case you try to find new book to learn, this book very acceptable to you. The book Mathematics for Secondary School Teachers (Maa Textbooks) is much recommended to you to read. You can also get the e-book from official web site, so you can more readily to read the book.

**Jerry Ingle:**

The book untitled Mathematics for Secondary School Teachers (Maa Textbooks) contain a lot of information on that. The writer explains the woman idea with easy way. The language is very simple to implement all the people, so do definitely not worry, you can easy to read this. The book was published by famous author. The author will bring you in the new time of literary works. You can actually read this book because you can continue reading your smart phone, or model, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site in addition to order it. Have a nice examine.

**Connie Nixon:**

Is it a person who having spare time after that spend it whole day through watching television programs or just lying down on the bed? Do you need something new? This Mathematics for Secondary School Teachers (Maa Textbooks) can be the solution, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these publications have than the others?
