Observational Astrophysics (Astronomy and Astrophysics Library) Pierre Léna, Daniel Rouan, François Lebrun, François Mignard, Didier Pelat

,This is the updated, widely revised, restructured and expanded third edition of Léna et al.'s successful work Observational Astrophysics. It presents a synthesis on tools and methods of observational astrophysics of the early 21st century. Written specifically for astrophysicists and graduate students, this textbook focuses on fundamental and sometimes practical limitations on the ultimate performance that an astronomical system may reach, rather than presenting particular systems in detail.

In little more than a decade there has been extraordinary progress in imaging and detection technologies, in the fields of adaptive optics, optical interferometry, in the sub-millimetre waveband, observation of neutrinos, discovery of exoplanets, to name but a few examples.

The work deals with ground-based and space-based astronomy and their respective fields. And it also presents the ambitious concepts behind space missions aimed for the next decades. Avoiding particulars, it covers the whole of the electromagnetic spectrum, and provides an introduction to the new forms of astronomy becoming possible with gravitational waves and neutrinos. It also treats numerical aspects of observational astrophysics: signal processing, astronomical databases and virtual observatories.

From reader reviews:

Angel Echols:

This Observational Astrophysics (Astronomy and Astrophysics Library) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is actually information inside this guide incredible fresh, you will get details which is getting deeper you actually read a lot of information you will get. This kind of Observational Astrophysics (Astronomy and Astrophysics Library) without we realize teach the one who reading it become critical in thinking and analyzing. Don't be worry Observational Astrophysics (Astronomy and Astrophysics Library) can bring whenever you are and not make your case space or bookshelves' come to be full because you can have it inside your lovely laptop even phone. This Observational Astrophysics (Astronomy and Astrophysics Library) having very good arrangement in word along with layout, so you will not feel uninterested in reading.

Jacqueline McArdle:

Precisely why? Because this Observational Astrophysics (Astronomy and Astrophysics Library) is an unordinary book that the inside of the guide waiting for you to snap this but latter it will distress you with the secret the idea inside. Reading this book alongside it was fantastic author who have write the book in such incredible way makes the content inside easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This amazing book will give you a lot of rewards than the other book have got such as help improving your skill and your critical thinking technique. So , still want to postpone having that book? If I ended up you I will go to the e-book store hurriedly.

Joe Lowe:

Don't be worry if you are afraid that this book may filled the space in your house, you may have it in e-book approach, more simple and reachable. This Observational Astrophysics (Astronomy and Astrophysics Library) can give you a lot of close friends because by you looking at this one book you have factor that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This book offer you information that probably your friend doesn't recognize, by knowing more than different make you to be great men and women. So, why hesitate? Let me have Observational Astrophysics (Astronomy and Astrophysics Library).

Robert Hutzler:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library as well as to make summary for some guide, they are complained. Just minor students that has reading's soul or real their passion. They just do what the professor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we

know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Observational Astrophysics (Astronomy and Astrophysics Library) can make you really feel more interested to read.
