Seaweed Ecology and Physiology

Christopher S. Lobban, Paul J. Harrison

Seaweed Ecology and Physiology Christopher S. Lobban, Paul J. Harrison

A rewritten and reorganized edition of *The Physiological Ecology of Seaweeds* (1985), this book contains a new introductory chapter reviewing seaweed morphology, cytology, life histories and an expanded treatment of tropical seaweeds. The final chapter on mariculture is much larger, and includes a case study on how principles of physiological ecology were applied in developing the carrageenan industry. Also contains an appendix summarizing the taxonomic position and nomenclature of the species mentioned in the book.
