Echo of Tomorrow: Book Two (The Drake Chronicles 2) Rob Buckman

For General Scott Drake the attack on four American cities by religious fanatic using nuclear weapons destroyed his life as he knew it. Yet in victory came defeat as he found three hundred years later in the world he woke up in. One far different from the one he'd left behind when he went into cold sleep. Now he and his men and women had to find a place in this strange new world, one without the means to wage war against an alien race raping the planet of its young people. First, he had to build an army, navy and air force from scratch while fending off attacks from the aliens and the secret government that wanted to put him and his men back into cold sleep or the grave. Now it was a race against time as they struggled to build a fleet while fighting saboteurs with one hand and a religious fanatic on the other. Now it was a question of if man could retain his place at the top of the food chain, or be reduced to the status of sheep.
