Nitrogen in Agricultural Systems (Agronomy Monograph) J.S. Schepers, W.R. Raun

New research tools and advanced management concepts are presented from a holistic perspective that emphasizes the complexity of the nitrogen cycle. Nitrogen in Agricultural Systems provides an extensive review of the principles and management implications related to nitrogen in the soil plant water system.

More than thirty leading experts address nitrogen in the context of environmental protection and the efficient use of resources. Significant advances have broadened the perspective from which authors discuss their specific views on each aspect of the nitrogen cycle.

This volume reviews the sources and forms of nitrogen in the environment and expands discussion of nitrogen loss mechanisms from soil and vegetation. Nitrogen transformations remain a common thread throughout the discussion of biological, chemical, physical, and weather-related interactions.

The subjects of accountability and nitrogen budgeting are emphasized because they have a strong bearing on management decisions and environmental implications. The concept of soil-plant resiliency is introduced as a framework to better understand how climate, soils, and plants interact to broadly delineate cropping eco-regions. Sections on economic considerations and water quality are included.

The nitrogen management principles described promote judicious global management of our nitrogen resources. The editors and authors provide a truly excellent book. We anticipate that readers will find this book to be a highly valued resource.

The American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America are prominent international scientific societies headquartered in Madison, Wisconsin. The Societies specialize in peer-reviewed, high-quality science titles for a wide variety of audiences. Some of the many areas we publish in include:

- Soils Methods and Management
- Crop Development and Improvement
- Agrosystem Management and the Global Food Crisis
- Environmental Conservation and Climatology

From reader reviews:

Mary Ayala:

The book Nitrogen in Agricultural Systems (Agronomy Monograph) make one feel enjoy for your spare time. You need to use to make your capable a lot more increase. Book can to get your best friend when you getting pressure or having big problem with the subject. If you can make studying a book Nitrogen in Agricultural Systems (Agronomy Monograph) to be your habit, you can get much more advantages, like add your capable, increase your knowledge about many or all subjects. You may know everything if you like available and read a guide Nitrogen in Agricultural Systems (Agronomy Monograph). Kinds of book are a lot of. It means that, science reserve or encyclopedia or some others. So , how do you think about this publication?

Christopher Thompson:

Spent a free time to be fun activity to do! A lot of people spent their free time with their family, or their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Will you something different to fill your own personal free time/ holiday? Could possibly be reading a book may be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the guide untitled Nitrogen in Agricultural Systems (Agronomy Monograph) can be excellent book to read. May be it could be best activity to you.

Sharon Hardin:

Many people spending their time by playing outside having friends, fun activity using family or just watching TV all day long. You can have new activity to shell out your whole day by studying a book. Ugh, ya think reading a book can actually hard because you have to use the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Nitrogen in Agricultural Systems (Agronomy Monograph) which is finding the e-book version. So , why not try out this book? Let's find.

Marie Walsh:

What is your hobby? Have you heard that will question when you got learners? We believe that that query was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. So you know that little person like reading or as reading through become their hobby. You must know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Numerous books that can you go onto be your object. One of them is Nitrogen in Agricultural Systems (Agronomy Monograph).
