The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology

J. M. Pickett

This is the only book to relate all three of the currently interactive areas of speech science-acoustic phonetics, speech perception, and speech technology. The book presents a gradual course, starting with a clear tutorial approach to basic speech then leading to speech perception research, the various theories of speech perception, and the modern speech technologies of computer synthesis and recognition of speech messages. The aim is to bring the reader through basic acoustics, spectrum analysis, vowel and consonant acoustics, and into the research literature of speech perception technology. The basic acoustic theory of speech production, the Source-Filter Theory, is clarified via text and diagrams. This knowledge is then applied to interpreting spectrograms of speech examples that sample all the phonetic distinctions among vowels and consonants. Distinctive acoustical patterns for vowel and consonant perception by listeners are summarized in detail based on the research literature. Critical discussions provide theories of motor, auditory, and computer recognition of speech. Consonant and vowel recognition by the hearing-impaired is described in relation to acoustic phonetic distinctions. Techniques of speech synthesis, recognition analysis by machines, and speech technologies are thoroughly explained. Anyone interested in speech acoustics, acoustic phonetics, speech and hearing science, psychoacoustics, and speech perception at any level.

From reader reviews:

Sheila Powell:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their spare time to take a walk, shopping, or went to the actual Mall. How about open or maybe read a book eligible The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology? Maybe it is for being best activity for you. You realize beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with their opinion or you have additional opinion?

James Donofrio:

The publication untitled The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology is the guide that recommended to you to see. You can see the quality of the book content that will be shown to you actually. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of research when write the book, therefore the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology from the publisher to make you more enjoy free time.

Nancy Kline:

Spent a free time to be fun activity to complete! A lot of people spent their free time with their family, or all their friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Could be reading a book could be option to fill your cost-free time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the reserve untitled The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology can be good book to read. May be it is usually best activity to you.

Duane Sills:

Reading a book to become new life style in this yr; every people loves to read a book. When you read a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what types of book that you have read. In order to get information about your research, you can read education books, but if you want to entertain yourself you can read a fiction books, these us novel, comics, and also soon. The The Acoustics of Speech Communication: Fundamentals, Speech Perception Theory, and Technology provide you with a new experience in reading through a book.
