Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics)

Jonathan A. Barmak

Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics)
Jonathan A. Barmak
This volume deals with the theory of finite topological spaces and its relationship with the homotopy and simple homotopy theory of polyhedra. The interaction between their intrinsic combinatorial and topological structures makes finite spaces a useful tool for studying problems in Topology, Algebra and Geometry from a new perspective. In particular, the methods developed in this manuscript are used to study Quillen's conjecture on the poset of p-subgroups of a finite group and the Andrews-Curtis conjecture on the 3-deformability of contractible two-dimensional complexes. This self-contained work constitutes the first detailed exposition on the algebraic topology of finite spaces. It is intended for topologists and combinatorialists, but it is also recommended for advanced undergraduate students and graduate students with a modest knowledge of Algebraic Topology.

From reader reviews:

Orlando Bush:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each book has different aim as well as goal; it means that guide has different type. Some people experience enjoy to spend their time to read a book. They are really reading whatever they consider because their hobby is reading a book. Consider the person who don't like studying a book? Sometime, person feel need book after they found difficult problem or maybe exercise. Well, probably you will require this Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics).

Gustavo Cyr:

Book will be written, printed, or created for everything. You can recognize everything you want by a guide. Book has a different type. As we know that book is important point to bring us around the world. Next to that you can your reading skill was fluently. A reserve Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics) will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think that will open or reading any book make you bored. It isn't make you fun. Why they could be thought like that? Have you in search of best book or appropriate book with you?

Michelle Jennings:

Is it you who having spare time in that case spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics) can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?

Shelley Gavin:

Do you like reading a reserve? Confuse to looking for your best book? Or your book seemed to be rare? Why so many query for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes studying, not only science book and also novel and Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics) or others sources were given understanding for you. After you know how the fantastic a book, you feel wish to read more and more. Science reserve was created for teacher or students especially. Those textbooks are helping them to add their knowledge. In additional case, beside science book, any other book likes Algebraic Topology of Finite Topological Spaces and Applications (Lecture Notes in Mathematics) to make your spare time more colorful. Many types of book like here.
