## Panpsychism: Past and Recent Selected Readings

*An anthology of readings in panpsychism, spanning two millennia.*

Panpsychism is the view that mentality extends from humans to animals, insects, plant cells, and other natural bodies exhibiting persisting unity of organization. Formulated in ancient times, it has since undergone a series of reformulations and defenses against criticisms, and is now experiencing a revival of interest. This comprehensive anthology, which includes selections spanning two millennia, chronicles the history of panpsychism, beginning with the early cosmologists of Greek philosophy and continuing into the present. The major philosophers responsible for developing and defending modern panpsychism are represented, including Leibniz, Fechner, Clifford, and Whitehead; detractors such as Edwards and Popper are also featured. An introduction outlines the principal issues raised in the selections, while commentaries accompanying the selections place them in context.

"Here we have, for the first time, a collection of a rich range of historical and contemporary materials on panpsychism, made easily accessible with helpful commentary. It is amazing that this has never been done before." — Peter H. Hare, editor of *Doing Philosophy Historically*
