**Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19** Anne Watson, Keith Jones, Dave Pratt

Big ideas in the mathematics curriculum for older school students, especially those that are hard to learn and hard to teach, are covered in this book. It will be a first port of call for research about teaching big ideas for students from 9-19 and also has implications for a wider range of students. These are the ideas that really matter, that students get stuck on, and that can be obstacles to future learning. It shows how students learn, why they sometimes get things wrong, and the strengths and pitfalls of various teaching approaches. Contemporary high-profile topics like modelling are included. The authors are experienced teachers, researchers and mathematics educators, and many teachers and researchers have been involved in the thinking behind this book, funded by the Nuffield Foundation. An associated website, hosted by the Nuffield Foundation, summarises the key messages in the book and connects them to examples of classroom tasks that address important learning issues about particular mathematical ideas.

### **From reader reviews:**

#### **Patricia Trevino:**

Spent a free time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? May be reading a book could be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to consider look for book, may be the guide untitled Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 can be fine book to read. May be it can be best activity to you.

#### **Doris Snell:**

You can spend your free time to learn this book this e-book. This Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 is simple bringing you can read it in the park your car, in the beach, train as well as soon. If you did not include much space to bring the actual printed book, you can buy the e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

#### **Lucy Nelson:**

That publication can make you to feel relax. That book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 was vibrant and of course has pictures on there. As we know that book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 has many kinds or variety. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and believe that you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.

#### **Christopher Williams:**

Book is one of source of information. We can add our information from it. Not only for students but in addition native or citizen require book to know the revise information of year to help year. As we know those publications have many advantages. Beside most of us add our knowledge, could also bring us to around the world. By book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19 we can have more advantage. Don't one to be creative people? For being creative person must choose to read a book. Just choose the best book that suitable with your aim. Don't become doubt to change your life with that book Key Ideas in Teaching Mathematics: Research-based guidance for ages 9-19. You can more inviting than now.
