Walter A. Triebel, Avtar Singh

## The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) Walter A. Triebel, Avtar Singh

Designers of microprocessor-based electronic equipment need a *systems-level* understanding of the 80x86 microcomputer. This volume offers thorough, balanced, and practical coverage of both software and hardware topics. Develops basic concepts using the 8088 and 8086 microprocessors, but the 32-bit version of the 80x86 family is also discussed. Examines how to assemble, run, and debug programs, and how to build, test, and troubleshoot interface circuits. Provides detailed coverage of floating-point processing and the single instruction multiple data (SIMD) processing capability of the advanced Pentium processor. Includes added material on number systems, logic functions and operations, conversion between number systems, and addition/subtraction of binary numbers. Includes new advanced material such as floating Point Architecture and Instructions, Multimedia (MMX) Architecture and Instructions, and the hardware and hardware architecture of the Pentium 3 and Pentium 4 processors. Covers the Intel architecture microprocessor families: 8088, 8086, 80286, 80386, 80486, and the latest Pentium® processors. Illustrates commands of the DEBUG program and how to assemble, disassemble, load, save, execute, and debug programs on the IBM PC. Introduces the contents of the 8088's instruction set. Explores practical implementation techniques, covering the use of latches, transceivers, buffers, and programmable logic devices in the memory and I/O interfaces of the microcomputer system. A valuable handbook for self-study in learning microprocessors, for electrical engineers, electronic technicians, and all computer programmers.

### **From reader reviews:**

#### **David Stokes:**

This book untitled The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) to be one of several books which best seller in this year, here is because when you read this publication you can get a lot of benefit into it. You will easily to buy that book in the book shop or you can order it by means of online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Cell phone. So there is no reason for you to past this book from your list.

#### **Glenda Rogers:**

Reading a publication can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new facts. When you read a reserve you will get new information due to the fact book is one of various ways to share the information or their idea. Second, studying a book will make a person more imaginative. When you studying a book especially hype book the author will bring that you imagine the story how the personas do it anything. Third, you are able to share your knowledge to other people. When you read this The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition), you may tells your family, friends and also soon about yours book. Your knowledge can inspire different ones, make them reading a reserve.

#### **Matthew Seifert:**

Would you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try to pick one book that you just dont know the inside because don't assess book by its handle may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) why because the amazing cover that make you consider about the content will not disappoint anyone. The inside or content is fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

#### **Martin Herrin:**

Do you like reading a publication? Confuse to looking for your selected book? Or your book ended up being rare? Why so many problem for the book? But any kind of people feel that they enjoy intended for reading. Some people likes examining, not only science book but additionally novel and The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) or even others sources were given information for you. After you know how the truly great a book, you feel would like to read more and more. Science book was created for teacher or even students especially. Those publications are helping them to include their knowledge. In various other case, beside science reserve, any

other book likes The 8088 and 8086 Microprocessors: Programming, Interfacing, Software, Hardware, and Applications (4th Edition) to make your spare time considerably more colorful. Many types of book like this one.
