The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging)

The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging)

Advances in fluorescent proteins, live-cell imaging, and superresolution instrumentation have ushered in a new era of investigations in cell biology, medicine, and physiology. From the identification of the green fluorescent protein in the jellyfish *Aequorea victoria* to the engineering of novel fluorescent proteins, **The Fluorescent Protein Revolution** explores the history, properties, and applications of these important probes.

The book first traces the history of fluorescent proteins and the revolution they enabled in cellular imaging. It then discusses fluorescent proteins with novel photophysical properties. The book also covers several cutting-edge imaging applications. These include superresolution microscopy of cellular fine structures, FRET microscopy to visualize protein interactions and cell-signaling activities inside living cells, photobleaching and photoactivation techniques to visualize protein behaviors, techniques that exploit plant and algal photoreceptors to enable light-regulated control of enzymatic activities, and the noninvasive imaging of tumor–host interactions in living animals.

In color throughout, this book presents the fundamental principles and latest advances in the field, including the associated development of imaging techniques that exploit fluorescent proteins. It is accessible to a broad audience, from optical imaging experts to novices needing an introduction to the field.

From reader reviews:

Ana Worcester:

Reading a book tends to be new life style on this era globalization. With reading through you can get a lot of information that will give you benefit in your life. Having book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only situation that share in the textbooks. But also they write about the ability about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on this planet always try to improve their skill in writing, they also doing some analysis before they write with their book. One of them is this The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging).

Mary Larrick:

The e-book with title The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging) has a lot of information that you can understand it. You can get a lot of advantage after read this book. That book exist new knowledge the information that exist in this publication represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This book will bring you inside new era of the syndication. You can read the e-book on your smart phone, so you can read that anywhere you want.

Cheryl Cooley:

Book is one of source of information. We can add our understanding from it. Not only for students but native or citizen require book to know the update information of year to be able to year. As we know those guides have many advantages. Beside we all add our knowledge, can bring us to around the world. By book The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging) we can get more advantage. Don't that you be creative people? To become creative person must choose to read a book. Just choose the best book that appropriate with your aim. Don't end up being doubt to change your life with that book The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging). You can more attractive than now.

Vera Pinckney:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from your book. Book is published or printed or highlighted from each source that filled update of news. In this particular modern era like currently, many ways to get information are available for you actually. From media social including newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the The Fluorescent Protein Revolution (Series in Cellular and Clinical Imaging) when you essential it?
