Regenerating Agriculture:: Policies and Practice for Sustainability and Self-Reliance Jules N. Pretty

It is becoming increasingly clear that a more sustainable agriculture can bring economic, environmental, and social benefits to farmers, communities, and nations. **Regenerating Agriculture** draws together for the first time new empirical evidence from a diverse range of agroecological and community settings to show the impacts of more sustainable practices. Twenty cases involving widespread success from Brazil, Burkina Faso, Honduras, India, Indonesia, Kenya, Lesotho, Mali, Mexico, Peru, Philippines, and Sri Lanka are presented, and are supported by field- and community-level data from more than 50 projects and programs in 28 countries. Despite this emerging evidence, many farmers still depend on high levels of external inputs.

Regenerating Agriculture, identifies the common elements of successful programs and shows how those still using "modernist" approaches to agriculture can successfully turn to sustainable farming.

The first chapter outlines the scale of the challenge and includes analysis of sustainable agriculture's characteristics and underlying philosophies and values. Pretty then presents analyses of the processes of agricultural modernization, focusing on both production- and conservation-oriented programs and policies and the common elements of success.

Almost all of these successes have been achieved despite existing, biased policy environments that strongly favor "modern" approaches to agricultural development, and at the same time discriminate against sustainability. **Regenerating Agriculture** examines policy frameworks and institutional processes, then sets out 25 effective policies that are known to work to support the transition to greater sustainability and self-reliance in agriculture.

Elizabeth Daugherty:

Is it anyone who having spare time and then spend it whole day by simply watching television programs or just lying down on the bed? Do you need something totally new? This Regenerating Agriculture:: Policies and Practice for Sustainability and Self-Reliance can be the reply, oh how comes? The new book you know. You are thus out of date, spending your time by reading in this fresh era is common not a geek activity. So what these ebooks have than the others?

Lorna Dews:

As a pupil exactly feel bored for you to reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful photos on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Regenerating Agriculture:: Policies and Practice for Sustainability and Self-Reliance can make you truly feel more interested to read.
