**"Overthrowing dictators, as if playing chess, will shatter the global peace and the world as we know it... Many will die."**

Exiled in London, 2009, and haunted by the painful memories of their old life marked by dictatorial control and oppression, Petra Sakovich and Ricardo Lavin are filled with ambition and desire for revenge. The two intellectuals create a mathematical theory which, when executed, generates a collapse of the totalitarian systems around the globe.

But The Theory is too powerful for them to contain. Unknowingly, they unleash a monster product of their obsession and moral agony. With the path of the time, what once was their dream, becomes a nightmare that forces them to run away from their own downfall.

In a vibrating story, suspenseful, tragic and awash on pure hope and resilience, "The Theory" exposes how careless of consequences the human actions can be, if they are propelled by a good combination of love and ambition.

*>>>> "Duque gives the reader a view of war not often seen by American civilians, but experienced by many innocents in dictatorships. I remained hopeful to the end in spite of much evidence to the contrary. Not sure a theory such as this is realistic or possible. Not being properly executed, the theory is disastrous."*

*>>>> "This book has everything I was looking for before I started reading! Elements of make-the-world-a-better-place and just by its side big human failures, great love story and amazing action."*

*>>>> "Superb read! Very vivid action scenes, it was almost as if I was watching a movie."*
