Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science)

Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science)

In two volumes, this new edition presents the state of the art in Multiple Criteria Decision Analysis (MCDA). Reflecting the explosive growth in the field seen during the last several years, the editors not only present surveys of the foundations of MCDA, but look as well at many new areas and new applications. Individual chapter authors are among the most prestigious names in MCDA research, and combined their chapters bring the field completely up to date.

Part I of the book considers the history and current state of MCDA, with surveys that cover the early history of MCDA and an overview that discusses the “pre-theoretical” assumptions of MCDA. Part II then presents the foundations of MCDA, with individual chapters that provide a very exhaustive review of preference modeling, along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences. Part III looks at outranking methods, with three chapters that consider the ELECTRE methods, PROMETHEE methods, and a look at the rich literature of other outranking methods.

Part IV, on Multiattribute Utility and Value Theories (MAUT), presents chapters on the fundamentals of this approach, the very well known UTA methods, the Analytic Hierarchy Process (AHP) and its more recent extension, the Analytic Network Process (ANP), as well as a chapter on MACBETH (Measuring Attractiveness by a Categorical Based Evaluation Technique). Part V looks at Non-Classical MCDA Approaches, with chapters on risk and uncertainty in MCDA, the decision rule approach to MCDA, the fuzzy integral approach, the verbal decision methods, and a tentative assessment of the role of fuzzy sets in decision analysis.

Part VI, on Multiobjective Optimization, contains chapters on recent developments of vector and set optimization, the state of the art in continuous multiobjective programming, multiobjective combinatorial optimization, fuzzy multicriteria optimization, a review of

the field of goal programming, interactive methods for solving multiobjective optimization problems, and relationships between MCDA and evolutionary multiobjective optimization (EMO). Part VII, on Applications, selects some of the most significant areas, including contributions of MCDA in finance, energy planning problems, telecommunication network planning and design, sustainable development, and portfolio analysis. Finally, Part VIII, on MCDM software, presents well known MCDA software packages.

From reader reviews:

Mildred Duncan:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite book and reading a publication. Beside you can solve your problem; you can add your knowledge by the guide entitled Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science). Try to face the book Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science) as your close friend. It means that it can to be your friend when you experience alone and beside regarding course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know almost everything by the book. So , we should make new experience as well as knowledge with this book.

Jerry Gunnell:

Playing with family within a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, subsequently why you don't try thing that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science), you are able to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.

Herbert Turley:

In this time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended to your account is Multiple Criteria Decision Analysis: State of the Art Surveys (International Series in Operations Research & Management Science) this e-book consist a lot of the information from the condition of this world now. That book was represented just how can the world has grown up. The language styles that writer make usage of to explain it is easy to understand. The particular writer made some exploration when he makes this book. Honestly, that is why this book ideal all of you.

Anna Bailey:

With this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become one of it? It is just simple way to have that. What you need to do is just spending your time not much but quite enough to experience a look at some books. Among the books in the top checklist in your reading list is usually Multiple Criteria Decision Analysis: State of the Art Surveys

(International Series in Operations Research & Management Science). This book and that is qualified as The Hungry Inclines can get you closer in getting precious person. By looking way up and review this reserve you can get many advantages.
