Knowledge: Readings in Contemporary Epistemology

In this anthology, distinguished editors Sven Bernecker and Fred Dretske offer the most comprehensive review available of contemporary epistemology. They bring together the most important and influential writings in the field, including selections that cover frequently neglected topics such as dominant responses to skepticism, introspection, memory, and testimony. *Knowledge* is divided into fifteen subject areas and includes forty-one readings by eminent contributors. An accessible introduction to each subject area outlines the problems discussed in the essays that follow so that students can focus on analyzing them.
